

# FIRST FOR GENUINE PARTS

**WHY COMPROMISE  
WHEN INFERIOR PARTS  
CAN EFFECT EFFICIENCY,  
TIME AND COST.**

Precision engineered equipment, such as the Elmo Rietschle vacuum and its low pressure product range, requires that each and every part is designed to work in harmony. This equipment works at its optimum efficiency and least stress because each part was designed and manufactured to work efficiently and effectively with each other. Each part has undergone hours of testing with multiple versions to find the optimum performance relationship.

When replacement components are as close to the original as possible, the equipment will benefit from a longer operational life, which is more efficient and effective with minimal downtime. That's why nothing can match the factory quality genuine spare parts for your machine.

**MAXIMUM EFFICIENCY**

**LESS  
EQUIPMENT STRESS**

**OPTIMUM  
PERFORMANCE**

**FULLY TESTED**

**LONGER  
OPERATIONAL LIFE**

**MINIMAL DOWNTIME**

## PROTECT YOUR EQUIPMENT

Our Genuine spare parts are tailor made to your Elmo Rietschle machine to optimise its life expectancy.

Non-genuine parts cannot meet the same standards as genuine parts and will therefore only have negative impact on the wear of your equipment.

## MAINTAIN YOUR PERFORMANCE

When you purchase and install an Elmo Rietschle machine, it will provide you with accurate operating performance matched to your application in terms of output, energy efficiency, air quality etc. To maintain performance throughout the life time of the equipment it is important that genuine spare parts that were designed and produced for the equipment are used. Only genuine parts will maintain the exact performance of the equipment and guarantee that it will continue to meet your application needs.

## REDUCE THE RISK OF LOST PRODUCTION

Significantly lower the risk of a production breakdown by using genuine spare parts. Using non-genuine spare parts, not only risks potentially lost production which is very costly, but also impacts the quality of your product, production time per unit and therefore profit margins. Always use genuine spare parts to maintain the productivity of your equipment.

## LOCAL SERVICE SUPPORT WHERE AND WHEN YOU NEED IT

Our global network of Distributor Partners are highly trained in servicing your equipment and will always use genuine spare parts. Located in convenient locations to offer quick and reliable on-site service support ensuring your machines are maintained quickly and effectively.
