

# FIRST FOR GENUINE PARTS

**WHY COMPROMISE**  
WHEN INFERIOR PARTS  
CAN EFFECT EFFICIENCY,  
TIME AND COST.

In precision engineered equipment, such as the Elmo Rietschle vacuum and low pressure product range, each and every part is designed to work in harmony with each other. This equipment works at its optimum efficiency and least stress because each part was designed and manufactured to work efficiently and effectively with each other. Each part has undergone hours of testing and many versions to find the optimum performance relationship.

When replacement components are as close to the original as possible, the equipment will benefit from a longer operational life, which is more efficient and effective with minimal downtime. Nothing can match the factory quality genuine spare parts for your machine.

**MAXIMUM EFFICIENCY**

**LESS  
EQUIPMENT STRESS**

**OPTIMUM  
PERFORMANCE**

**FULLY TESTED**

**LONGER  
OPERATIONAL LIFE**

**MINIMAL DOWNTIME**

## PROTECT YOUR EQUIPMENT

Our Genuine spare parts are tailor made to your ElmoRietschle machine to optimize its life expectancy and save energy.

Non-genuine parts cannot meet the same standards as genuine parts and will therefore only have negative impact on the wear of your equipment.

## MAINTAIN YOUR PERFORMANCE

Our Genuine spare parts are tailor made to your Elmo Rietschle machine to optimize its life expectancy and save energy.

Non-genuine parts cannot meet the same standards as genuine parts and will therefore only have negative impact on the wear of your equipment.

## REDUCE RISK OF LOST PRODUCTION

Significantly lower the risk of a production breakdown post service by using genuine spare parts. Using non-genuine spare parts, not only risks potential lost production which is very costly, but will could also impact your product quality, production time per unit and therefore profit margins. Always use genuine spare parts to maintain productivity of your equipment.

## LOCAL SERVICE SUPPORT WHERE AND WHEN NEEDED

Our global network of Distributor Partners are highly trained in servicing your equipment and will always use genuine spare parts. Located in ideal locations to offer quick and reliable on-site service support to ensure your machines are maintained quickly and effectively, minimising any potential risk of lost production.
